

## Manufacturing

*Q: What do leading manufacturers in all these industries have in common?*

- Automotive
- Building Products
- Chemical
- Engine
- Energy Efficiency
- Energy Technology
- Health Care
- Industrial Gas
- Pharmaceutical
- Pipeline
- Refinery

*A: Increasingly high stakes in U.S. energy and environmental regulatory and policy debates.*

*Has your company conducted an energy audit?*

*Does it know the size of its carbon footprint?*

*How will you hold suppliers accountable for maintaining your high environmental standards?*

*Could on-site power generation through waste heat, rooftop solar or other technologies save your company millions?*

Find answers to these and other questions before shareholders, employees and customers ask them.
