

Energy Regulation & Compliance

ELECTRIC

Follow our Electric Practice on Twitter

Van Ness Feldman's nationally recognized Electric Practice provides strategic counsel to all sectors of the electric utility industry.

Our expertise enables clients to effectively navigate complex legal, regulatory, policy, and transactional issues that impact strategic planning, operations, and revenues. In an increasingly competitive marketplace, our attorneys facilitate early identification of risks and opportunities and translate those assessments into decisive commercial advantages.

Importantly, our firm remains at the forefront of issues fundamental to the transformation of the electric utility industry. Complementing our traditional regulatory and compliance teams are experienced attorneys with the skill sets necessary to address renewable power development and integration, NERC reliability requirements, new transmission infrastructure, smart grid deployment, demand response, and FERC audits and investigations.

We invite you to learn more about our capabilities:

- FERC Regulation and Compliance
- Transmission Infrastructure, Planning, Rate Design, and Cost Allocation
- NERC Reliability and FERC Enforcement
- Energy Transactions, Project Development, Permitting
- Renewables, Energy Efficiency, Demand Response, and Smart Grid

If we can provide you with additional information, please contact us at electric@vnf.com.
