PRACTICES

Electric

Hydropower

Oil, Gas, & LNG

EDUCATION

Notre Dame Law School

Wake Forest University

BAR AND COURT ADMISSIONS

Virginia State Bar

Professional Background

Ted clients on a wide range of regulatory and permitting matters before the Federal Energy Regulatory Commission (FERC), including hydropower and natural gas proceedings. Ted leverages his deep government experience to manage and resolve complex legal challenges implicating the Natural Gas Act, the Federal Power Act, the National Environmental Policy Act, the Clean Water Act, and the Endangered Species Act.

Ted's substantial expertise in FERC matters is grounded in his eleven years of experience in FERC's Office of the General Counsel, where he routinely drafted certificate orders for interstate natural gas pipelines and LNG facilities, prepared licensing orders for hydropower projects, and oversaw compliance matters involving FERC-jurisdictional projects. Recently, Ted helped spearhead FERC's Order No. 1977 rulemaking implementing amendments to Section 216 of the Federal Power Act, which governs federal siting authority for interstate electric transmission facilities. He also served as principal legal contact for interagency consultations under the Endangered Species Act and worked with FERC's Office of Energy Market Regulation on natural gas pipeline rate matters, leases, and shipper protests.

Earlier in his career, Ted served as legislative correspondent for then-Congressman Chris Van Hollen—experience that continues to inform his approach to finding practical solutions on legal and policy issues.

Ted earned his J.D. from Notre Dame Law School, where he received the Jon E. Krupnick Award for excellence in trial advocacy, and served as a board member of the Notre Dame Trial Team.
